*As per the judging & structure info sheet, please note that there is a height restriction for your garden design. No part of the vertical structure should exceed two metres in height. Please also ensure that any form of construction on the site is safe and that you have undertaken a risk assessment in respect of both the work to be carried out in construction and on any element of the design that may be a potential hazard. We also do not allow deep insertion into the ground without prior agreement. A copy of this risk assessment should be provided to Lilanie.self@bathandwest.co.uk one week prior to the set-up date.*

This year the judging will be in two parts with teams of students or other amateurs and separately for professional garden designers. Please indicate which category is applicable.
